Course Numbering and Scheduling

Explanation of Course Codes for KTS — Campus Data Exchange

Course codes are a critical element used in the data exchange between technical centers and home high schools. As courses and sections are set up in the technical centers, the automated process adds identifiers to the course code and uploads each course to the KTS Course Catalog in the home high schools. A prefix and suffix are added to the state course code to create a unique 13-digit number that identifies the technical school, period and section of the course being taught. Example:

Technical school ID* + **State Course Code** + **Technical School Period Number** + **Technical School Section Number**

714480503P103

The above technical course code represents a course that is being taught at Jessamine County ATC and is indicated by using the *Technical Center ID: **(714)**. The name of the course is Basic Welding and indicated by the state course code **480503**. The period the course will be taught is period one, and indicated by **P1**. The section in which the course is taught is section three, and indicated by **(03)**.
